

Virginia Green Certification

The Oceanfront Inn is proud to be a participating Virginia Green Lodging member. In our commitment to minimize our impact on the environment and conserve our natural resources, we utilize the following practices in our business:

- Ø **Optional Linen Service**: In our effort to conserve energy and water, we offer our guests the option to choose or not to choose to have the sheets and towels refreshed daily. If your choice is not to refresh linen daily, please mark your choice on the card provided in your room.

- Ø **Recycling**: We provide the opportunity to recycle when disposing of items in collection bins situated in guest rooms, guest hallways and staff offices. Please dispose of acceptable items only, as follows: cardboard, newspapers, office paper, magazines, catalogs, old forms/files, aluminum cans, foil/pie tins, steel/tins cans, plastic bottles (water, soda, juice and milk), glass bottles and jars (brown, clear and green). Unacceptable items are as follows: adhesives, paper plates and towels, coffee filters, plastics (other than bottles), napkins, Styrofoam, paper cups, tissue paper, food, containers and trash. Bins are collected by our maintenance staff regularly and deposited into our TFC recycling dumpster. TFC empties the dumpster on a regular schedule.

- Ø **Water Conservation**: We have installed water-saving showerheads and toilets. To assist our staff with leak detection, please report any leaks and be sure to turn off faucets completely after use.

- Ø **Energy Conservation**: We use LED Exit signs, and efficient heating and cooling.

- Ø **Green Events**: Recycling collection bins can be made available for any scheduled event. Packages patronizing all Virginia Green certified establishments are available.
